mario.muellner@walderwyss.com

Mario Müllner is a member of the Legal Tech & Knowledge Management team. He specializes in document automation as well as the configuration and administration of various tools for document creation and our VDR platform my.walderwyss.

Before joining Walder Wyss, Mario Müllner worked for eight years as an ATSEP (Air Traffic Safety Electronic Personnel) with a focus on radar and multilateration systems. During this time, he acquired extensive technical know-how, particularly in the fields of electrical engineering, high-frequency technology, network technology, and server administration (Linux). In addition, he has basic knowledge of various programming and description languages such as C, C++, Java, JavaScript, PHP, HTML, CSS, VHDL, and VBA. He also gained experience in project management and project collaboration through several procurement projects for Swiss air traffic control and the federal government.

Alongside his work as a Legal Engineer, Mario Müllner completed a Bachelor of Science degree in Business Law at ZHAW. His studies focused on the Private profile, which corresponds to a private law specialization.
